

Brainsharer Multi-user annotation modalities

Mode	Description	Feature	Benefit
Individual 	Anatomist creates/edits annotations at own pace but may share afterward	Create individual annotations, not time-synchronized	Annotation capability, dissemination to others (publications, reference)
Team 	Anatomists create/edit annotations [different structures or different sections], store on platform and are aggregated for QC review	Aggregated individual annotations or "divide and conquer", not time-synchronized	Productivity Increase
Instructor 	Single user has create/edit capability but many observers may view annotation creation live	One-to-many modality, time-synchronized	Training tool
Collaboration 	Full create/edit capability by >1 anatomist (Note: May be combined with "view only" observers)	Many-to-many modality, time-synchronized	Full collaboration
